

MINI PROJECT DOCUMENTATION

STUDENT OPPORTUNITY TRACKER

An AI-Powered Web Application for Managing Student Opportunities and Deadlines

Developed Using: Base44 AI

Project Type: B.Tech CSE Mini Project

Domain: Web Application / Artificial Intelligence / Student Productivity

Live Application

<https://smart-origami-study-path.base44.app>

Prepared for Academic Project Submission

1. ABSTRACT

College students frequently miss important opportunities such as job applications, internships, examinations, hackathons, scholarships, certifications, and college events because information is distributed across multiple platforms. The **Student Opportunity Tracker** provides a centralized web platform where students can record, organize, monitor, and manage important opportunities and deadlines. The application includes deadline tracking, countdowns, job and internship tracking, exam management, calendar view, reminders, analytics, and AI-powered prioritization. The project was developed using Base44 AI as an AI-powered application development platform.

2. INTRODUCTION

Students today manage academic responsibilities alongside internships, jobs, hackathons, scholarships, certifications, and other career opportunities. Information is commonly received through college notices, emails, messaging groups, job portals, company career pages, and social media. Because this information is scattered, students may forget important deadlines or discover opportunities after the application period has ended. The Student Opportunity Tracker provides a single platform to manage these activities efficiently.

3. PROBLEM STATEMENT

Problem: College students frequently miss deadlines for jobs, internships, examinations, hackathons, scholarships, and other opportunities because information is scattered across multiple platforms and there is no centralized system to manage and prioritize these deadlines.

Proposed Solution: Develop a web application that allows students to store opportunities, track deadlines, set reminders, monitor applications, manage examinations, view a calendar, analyze progress, and receive AI-powered recommendations.

4. OBJECTIVES

- Create a centralized platform for managing student opportunities.
- Reduce missed deadlines.
- Provide automatic deadline prioritization.
- Help students track job and internship applications.
- Provide examination and academic deadline management.
- Provide reminders and notifications.
- Provide an interactive calendar.
- Use AI for personalized recommendations.
- Provide productivity analytics.
- Create a simple and user-friendly student dashboard.

5. SCOPE OF THE PROJECT

The application can be used by B.Tech students, degree students, freshers, job seekers, internship seekers, examination candidates, and students participating in hackathons. Future extensions can include college-wide opportunity portals, placement-cell integration, email and messaging notifications, mobile applications, job APIs, internship APIs, resume analysis, and personalized career recommendations.

6. EXISTING SYSTEM

Students generally depend on multiple sources to track opportunities, including college notices, emails, WhatsApp groups, job portals, internship websites, and social media.

Limitations:

- Information is scattered.
- Students manually maintain deadlines.
- No centralized dashboard.
- Difficult to prioritize tasks.
- Students may forget application deadlines.
- No intelligent recommendations.
- Difficult to track job application progress.

7. PROPOSED SYSTEM

The proposed Student Opportunity Tracker combines academic and career opportunity management into one web application. A centralized dashboard displays today's deadlines, weekly deadlines, completed and overdue tasks, jobs, internships, examinations, hackathons, scholarships, and certifications. AI-powered recommendations help students determine what to focus on first and generate personalized weekly plans.

8. KEY FEATURES

Feature	Description
Student Dashboard	Overview of today's, weekly, completed, overdue, and upcoming activities.
Deadline Management	Create, edit, delete, prioritize, and monitor deadlines.
Job & Internship Tracker	Track company, position, location, compensation, deadline, and application stage.
Exam Tracker	Record subject, date, time, venue, syllabus, and preparation status.
Calendar	View deadlines and activities by date.
Smart Reminders	Configure reminders before important deadlines.
AI Deadline Assistant	Prioritize urgent tasks, detect conflicts, and generate personalized plans.
Analytics	View completed, pending, overdue, and category-wise productivity information.

9. SYSTEM WORKFLOW

Student → Create Account → Student Profile → Add Opportunities → Jobs / Internships / Exams / Hackathons / Scholarships / Events → Deadline Tracking → AI Prioritization → Smart Notifications → Dashboard → Analytics & Progress

10. SYSTEM MODULES

Authentication: Registration, login, logout, and user profile.

Dashboard: Overview of deadlines and opportunities.

Opportunity Management: Add, edit, delete, and track opportunities.

Job & Internship Management: Track application progress.

Exam Management: Store and monitor examination information.

Calendar: Date-based visualization of deadlines.

Notification System: Reminders for approaching deadlines.

AI Assistant: Intelligent prioritization and personalized planning.

Analytics: Productivity and completion insights.

11. TECHNOLOGIES USED

Technology	Purpose
Base44 AI	Application development and deployment
Artificial Intelligence	Smart recommendations and planning
Web Technologies	User interface
Database	Storing student and opportunity data
Authentication	Secure user access
Responsive Design	Desktop, tablet, and mobile support

12. DATABASE DESIGN

User: User ID, Name, Email, College, Degree, Branch, Graduation Year

Opportunity: Opportunity ID, Title, Category, Organization, Deadline, Priority, Status, Link, Notes

Application: Application ID, Company, Position, Location, Salary/Stipend, Deadline, Status

13. FUNCTIONAL REQUIREMENTS

- Register and log in.
- Create and edit a student profile.
- Add, edit, and delete opportunities.
- Track deadlines and set reminders.
- Track jobs and internships.
- Track examinations.
- View opportunities on a calendar.
- Search and filter opportunities.
- View analytics.
- Receive AI recommendations.
- Generate personalized weekly plans.

14. NON-FUNCTIONAL REQUIREMENTS

Usability: Simple and student-friendly interface.

Performance: Fast loading of dashboard and opportunity data.

Security: Authenticated access to personal information.

Scalability: Support for additional users and opportunity categories.

Responsiveness: Compatible with desktop, tablet, and mobile devices.

15. ADVANTAGES

- Centralized opportunity management.
- Reduces missed deadlines.
- Saves students' time.
- Easy to use.
- AI-powered prioritization.
- Job and internship tracking.
- Exam management.
- Smart reminders.
- Calendar-based tracking.
- Productivity analytics.
- Personalized weekly planning.

16. LIMITATIONS

- Opportunities may need to be manually entered unless external APIs are integrated.
- Reminder functionality depends on configured notification capabilities.
- AI recommendations depend on information available in the system.
- The current project is primarily designed as a web application.

17. FUTURE ENHANCEMENTS

- AI resume-to-job matching.
- Automatic job and internship discovery using external APIs.
- Email notifications.
- WhatsApp/Telegram notifications.
- Android and iOS mobile applications.
- College and placement-cell integration.
- AI career advisor based on skills, interests, projects, and job requirements.
- Voice assistant for deadline queries.

18. TESTING

Test Case	Expected Result
User registration	Account created successfully
User login	Dashboard displayed
Add deadline	Deadline added successfully
Edit deadline	Information updated
Delete deadline	Deadline removed
Search opportunity	Relevant result displayed
Calendar	Deadline displayed on correct date
Priority	Urgent deadlines highlighted
Application tracking	Status updated correctly
AI assistant	Recommendations generated
Responsive design	Application works on different screen sizes

19. RESULT

The Student Opportunity Tracker provides a centralized platform for managing academic and career deadlines. It combines opportunity tracking, reminders, calendar visualization, analytics, and AI-powered prioritization to help students manage their responsibilities effectively.

20. CONCLUSION

The Student Opportunity Tracker addresses a common problem faced by college students: missing important deadlines because information is distributed across multiple platforms. By combining deadline management, opportunity tracking, reminders, calendar visualization, analytics, and AI-powered recommendations, the application provides a practical and scalable solution for student productivity and career planning. The project also demonstrates how an AI-powered development platform such as Base44 can be used to create and deploy a functional web application efficiently.
